EDUCATION

HO CHI MINH CITY UNIVERSITY OF TECHNOLOGY

Ho Chi Minh City, VN

B.A. English Language

2018 - 2022

EXPERIENCE

AES VIETNAM

Ho Chi Minh City

Business Analyst

April 2024 – Current

- Collaborated with clients to gather and analyze business requirements, delivering tailored Business Requirement Documents (BRD) and Functional Specification Documents (FSD) for 2 projects.
- Implemented Manufacturing Execution Systems (MES) for 3 factory clients, enhancing operational efficiency by 15% through optimized workflows and smart factory solutions.
- Design mockups, wireframes, and prototypes to visualize system workflows and user interactions.
- Work closely with cross-functional teams, including Developers, Testers, and the IoT team, to ensure seamless collaboration and project alignment.
- Support go-live activities, conduct user training, and oversee pilot testing of the system at the manufacturing site to ensure smooth deployment and user adoption.

LUMOS IS - ERP SOLUTION

Ho Chi Minh City

Business Analyst

June 2023 – March 2024

- Collaborated with stakeholders to gather, refine, and document user requirements in the Business Requirement Specification, ensuring alignment with business objectives.
- Designing and implementing ERP system functionalities based on Agile principles using low-code software called Oracle Apex. Developing dashboards, reports, and features according to customer requirements.
- Deploying software for clients during testing phases, providing guidance on software usage, and offering support in case of system issues. Modifying system functionalities based on customer requests.

PROFESSIONAL PROJECTS

AES VIETNAM

Nam Tan Uyen, Binh Duong Province, Vietnam

Spartronics Manufacturing Execution System (SMES)

December 2024 – Now

- Developed a custom SMES from scratch, integrating IoT (FPC Device) and enabling real-time monitoring for SMT production lines.
- Implemented process route management, traceability, reporting, and quality control to streamline workflows, ensure product tracking, and enhance quality assurance based on client requirements.

AES VIETNAM

Nam Tan Uyen, Binh Duong Province, Vietnam

Apriso Integration for Electroplating Process Monitoring (PNJ)

December 2023 – December 2024

- Digitized electroplating production processes using Apriso, automating surface area calculations and reducing manual user operations by 40%.
- Minimized rework errors by 25% and optimized coating thickness, enhancing production quality, integrating data from SCADA to Apriso systems for real-time production tracking.

SKILLS

Business Analysis: Requirement Gathering, BRD/FSD Documentation, Agile & Scrum

Design & Visualization: Wireframing, Prototyping (Figma), BPMN, UML (Visio, Draw.io)

Technical: SQL, Power BI, ERP Systems (Oracle Apex), MES

Soft Skills: Communication, Problem Solving, Critical Thinking, Presentation

Languages: Vietnamese, English, Chinese

LANGUAGES

Vietnamese: Native

English: Fluent

Chinese: Intermediate
